10.07 Guest Boats

A guest boat can only be launched at the Boat Ramp with sponsorship and in the company of an Association member in good standing. Guest boats are restricted to a maximum 48-hour access in any 30-day period. Lake access for a guest boat requires approval from the Boat Ramp Manager or Boat Ramp Guard at time of launch, subject to rules and procedures established by the Rules & Regulations Committee. An Association member in good standing may request full season access for a "surrogate" boat for special circumstances (e.g., regular vessel undergoing long term service repairs). For approval of a surrogate boat, the Association member cannot concurrently have a boat on the lake of similar type, unless special approval is obtained through the Rules and Regulation Committee. The Rules & Regulations Committee is empowered to develop procedural details and nominal fines for rule violations. Rules, procedures and fines will be posted at the Boat Ramp. Fines cannot exceed the amounts outline in Section 10.03 Regulations Committee.
